HR-V

EQUIPPED WITH
Honda
SENSING

HR-V RS Turbo CVT Honda SENSING

HR-V V Turbo CVT Honda SENSING

HR-V S CVT Honda SENSING

SENSE OF STYLE

Take the pleasure of driving to a whole new level with its sleek body silhouette — an all-new design for the HR-V. An integrated grille for a more pronounced facade and a three-dimensional rear design for elevated functionality and style. The glossy black front grille reflects an intense energy. The Amp Up design logo* on the lower front bumper reflects the feeling of a different new energy. The LED tail lights with LED light bar gives it the extra sporty look. While, the 17-inch alloy wheels (for V & S only) provide a stronger character design. It has up to 196 mm** ground clearance fitting for a crossover vehicle.

RS FEATURES

Sporty Chrome Front Grille and Sport Bumper (with Red Amp Up Line)

HR-V V TURBO CVT & S CVT

V Turbo Bumper

S CVT Bumper

Smoke LED Light Bar

Glossy Black Side Sill Garnish with Chrome Accent

V Turbo Alloy Wheels

S CVT Alloy Wheels

Gray Alloy Wheels*

Sequential LED Turn Lights

Dual Tailpipe Finisher*

Full LED Headlights with LED Daytime Running Lights (DRL) and Turn Signal

LED Fog Lights

SCAN TO KNOW MORE ABOUT THE HR-V RS

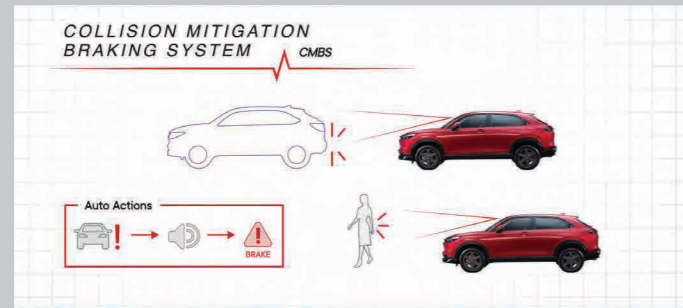

*This Amp Up design is exclusive for Turbo Variants only (V and RS)

**Available for S only

Honda SENSING

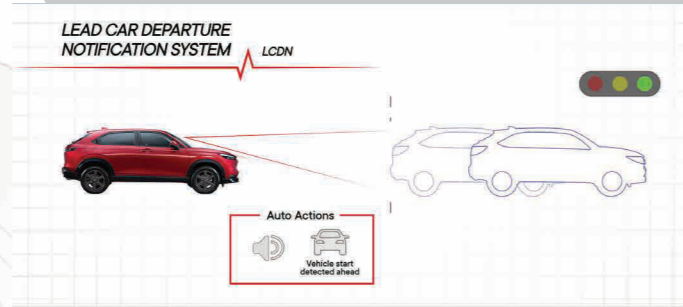

HR-V RS Turbo CVT Honda SENSING

Collision Mitigation Braking System (CMBS)

Collision Mitigation Braking System or CMBS helps to warn, mitigate collision, or lessen the severity of the frontal collision.

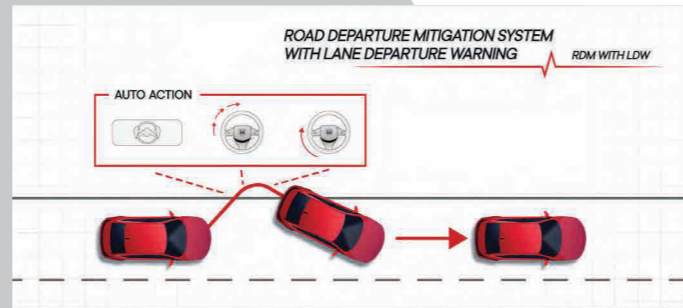

Lead Car Departure Notification (LCDN)

Lead Car Departure Notification System or LCDN keeps you informed by alerting when the car in front you has moved ahead from a standstill.

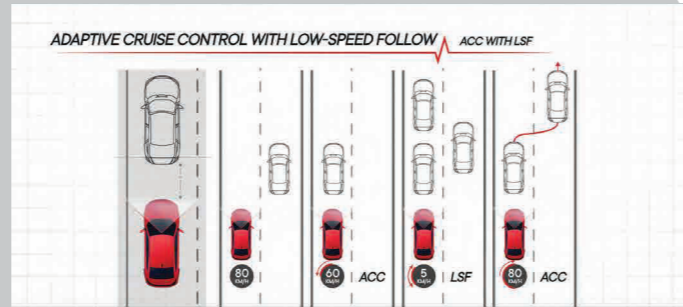

Lane Keeping Assist System (LKAS)

Lane Keep Assist System or LKAS keeps the vehicle at the center of the visible road lanes and in the best driving position as it guides you to follow the flow of the road.

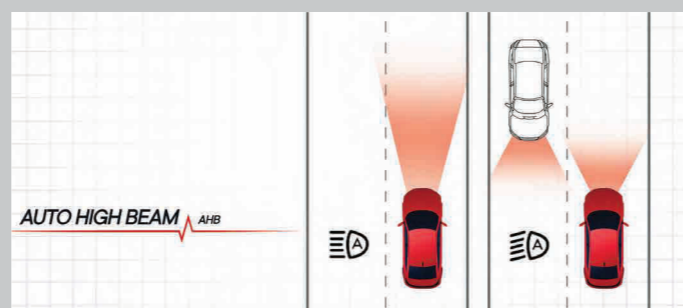

Road Departure Mitigation (RDM) with Lane Departure Warning (LDW)

Road Departure Mitigation or RDM helps you avoid collision by providing audible and visual warning whenever the car swerves to the other lane without the proper use of signal lights, while the Lane Departure Warning or LDW notifies you when going off course.

Adaptive Cruise Control (ACC) with Low-Speed Follow (LSF)

The Adaptive Cruise Control (ACC) is perfect for long drives as it lessens your fatigue by maintaining the distance based on the car in front of you, braking and accelerating as needed; while the Low Speed Follow or LSF helps make it easier to drive during stop-and-go traffic.

Auto High Beam (AHB)

Auto High-Beam or AHB allows you to automatically turn on the high beams when there are no other vehicles ahead and lower your beam appropriately when encountering oncoming traffic.

SENSE OF SAFETY

The HR-V features an advanced collision-free system: the Honda SENSING. With a state-of-the-art wide-angle camera and a high speed image processing chip, the field of vision is wider, so the system detects the situation in front much faster. This gives you useful, really helpful driving assistance. It lets you drive with confidence even great for long drives. Honda SENSING is available on both V and S variants.

**Honda SENSING still requires responsible and safe driving*

Front, Side and Curtain* Airbags

*Exclusive to RS Turbo

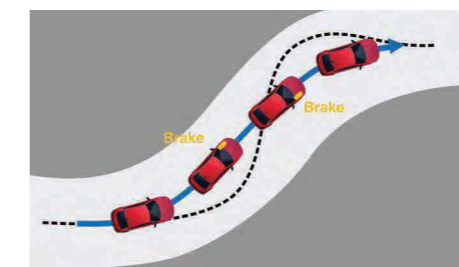

LaneWatch (Exclusive to RS)

Walkway Auto Lock

Hill Descent Control (HDC)

Agile Handling Assist (AHA)

Rear Seat Reminder

Front & Rear Passenger Seat Belt Reminder

SCAN TO KNOW MORE ABOUT Honda SENSING

SENSE OF SPACE

In addition to the beautiful proportions, the interior space has been significantly improved. The overall length has been kept at the current size, while the foot and knee space in the rear has been increased by 35 mm compared to the previous generation — providing driver and passenger comfort especially for long drives. The centre tank layout gives the cargo area more versatility and space.

For your different storage needs, the rear seats can be adjusted three ways: In Utility Mode, the rear seats can be folded flat — a Honda signature. In Long Mode, the front and rear seats can be folded to maximize space for long cargo. In Tall Mode, the rear seats can be flipped up to maximize vertical space for tall cargo.

SENSE OF LUXURY

Feast your eyes on the cool instrument cluster and 8" advanced touchscreen display audio with Apple CarPlay and Android Auto that provide you with useful information while driving. Get your hands on the steering wheel designed for maximum driver experience, equipped with steering wheel-mounted paddle shifters that allow you to change gears quicker and safer. Lose yourself in the luxury of supple leather seats. The Automatic Brake Hold maintains the vehicle in a stopped state, even if the driver takes their foot off the brake pedal. Enjoy the comfort of rear vents and rear power outlets. Plus, it is now equipped with Air-Diffusion System that is designed to direct the airflow along the sides and the roof of the vehicle which feels like a pleasant breeze.

8" Advanced Touchscreen Display Audio (with Apple CarPlay and Android Auto)

Electronic Parking Brake with Auto Brake Hold

Automatic Airconditioning with Air-Diffusion System

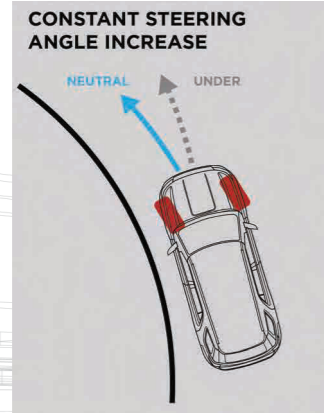

Sport Pedals (Exclusive to RS)

8-way Power Seat (Exclusive to RS)

SENSE OF PERFORMANCE

Feel the rush of the 1.5L VTEC Turbo engine with quick acceleration -- great for overtaking and driving on highways. Being the first HR-V with a turbo engine, it gives a strong power output and torque without compromising fuel efficiency. Refined with the latest technology, the CVT features less friction and step-up shift control for a fun driving experience as well as a low fuel consumption. When accelerating strongly near full throttle, the step-up shift control is applied. This allows the driver to experience exhilarating acceleration in harmony with the flowing scenery and the booming engine sound. In addition, the step-down shift control allows the driver to automatically downshift with soft braking. This makes "engine braking" and keep high RPM to provide a lightness and safer deceleration feel. The new RS variant is equipped with a **Variable Gear Ratio (VGR) Steering** that provides reduced risk of oversteering, greater driving stability, confident lane changes, and improved driving safety.

Variable Gear Ratio (VGR) Steering*
(Exclusive to RS Turbo)
