When user worry about his/her parents or children, user can watch the driving of them and know where and how much speed they are driving.

3-2-1 Geofencing Mode
3-2-2 Speed Alert

1-2 Function Overview

Convenient & Comfort

Vehicle Dashboard

Service overview

Visualizing vehicle state such as the presence or absence of abnormality of the vehicle, improve convenience of vehicle management.

Usecase

Information on cars is gathered in the palm of user's hand, so user can manage his/her car easily by watching car status anytime, anywhere.

4-2 Car Status

POI Search

Service overview

Function to search convenience store, ATM, Gas station and favorite place around current location.

Usecase

User can search the nearest convenience store / ATM / Gas station / Dealer / etc.

4-5-4 Location Search

In-Car WiFi

Service overview

Providing internet environment inside car.

Remark: Function available only in Thailand

Usecase

- Animation for child entertainment
- Game in Passenger's seat
- Outside working

3-2-4 Wi-Fi Hotspot

Remote Vehicle Control

Service overview

Remote vehicle controlling from smart phone (such as Door lock/unlock, Engine start/stop with A/C ON, Light ON).

Usecase

By setting temperature inside car before driving, user can start his/her drive with comfortable temperature.

4-1 Remote Vehicle Control

Find my Car

Service overview

Provide latest location of vehicle.

Usecase

User can search for his/her vehicle location when your vehicle is not found at the original parking space and seems to be stolen.

4-3 Find My Car

1-2 Function Overview

Communication

1to1 Message

Service overview
Direct message from Honda.

Usecase
Direct mail from Dealer remind you about periodical maintenance, connected service renewal, insurance renewal, tax remainder, etc.

SNS Posting

Service overview
Sharing drive event, Memorial event on SNS.

Usecase
Sharing user's travel memories with his/her friends by posting his/her drive records and memorial scene to SNS.

4-5-5 Message

4-5-2 Driving Behavior

2-2 TOP Page (HKO)

- "Location Search" and "Emergency Call" function are on TOP Page2.

The screenshot displays the 'TOP Page2' of the Honda CONNECT app. At the top, there is a status bar with the time 'SKT 13:49' and a battery icon. Below this is a navigation bar with the 'Honda CONNECT' logo and a settings gear icon. A red double-headed arrow points to the top bar with the text 'Swipe down: Go back to TOP Page1'. The main content area is divided into two sections: 'Location Search' and 'Emergency Call'. The 'Location Search' section contains six icons: 'Find My Car', 'Favourites', 'Dealer', 'Gas Station', 'ATM', and 'Convenience Store'. The 'Emergency Call' section contains five icons: 'Call Center & RSA', 'Insurance', 'Call Dealer', 'Police', and 'Ambulance'. At the bottom, there is a dark blue bar with five icons: a phone, a road, a car, a location pin, and an envelope. A red double-headed arrow points to this bar with the text 'Swipe up: Go to TOP Page3'. Below the app interface, there are five labels with lines pointing to the corresponding icons in the bottom bar: 'Emergency Call', 'Driving Behavior', 'Top Page1', 'Location Search', and 'Message'.

User will receive message as below;

Failed

Remote engine cannot be executed as the engine started by a key. Please stop engine manually.

Limitation of Remote Engine Start Command

If Remote engine start/stop command activated 2 times consecutively, it will NOT be able to start via Honda CONNECT App. User must use vehicle key to start engine manually then command can be possible by using Honda CONNECT App.

User will receive message as below;

Failed

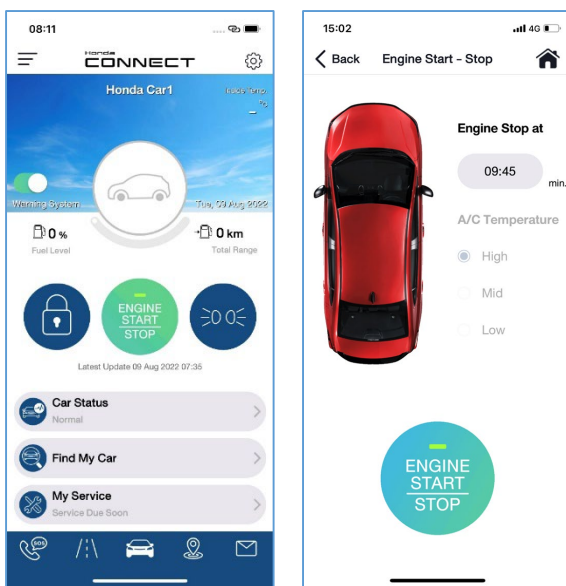

Remote engine start reached the limited. You can used Remote Engine Start 2 times. To reset the limit, please start the engine by a key.

4. Application Function

4-1 Remote Vehicle Control 4-1-2 Engine Start/Stop (AOC)

Limitation of TCU to update Remote Engine Status

Telematic Control Unit (TCU) will send update engine status only 1 time after commanded. As data is sent via telecommunication network which engine status may not update due to network error. Below are the sample cases;

1. Engine Start/Stop button is remained activate after send engine stop command;

Cause;

Engine stop data is lost while sending due to network error.

Solution;

Push IG ON then IG OFF on vehicle to update correct status.

2. Engine Start/Stop button is remained activate after send engine stop command;

Cause;

Fast command Start engine then Stop engine may cause data mis order. Engine Stop command may send prior Engine Start command then button status is keep activated even actual engine is stop.

Solution;

Push IG ON then IG OFF on vehicle to update correct status.

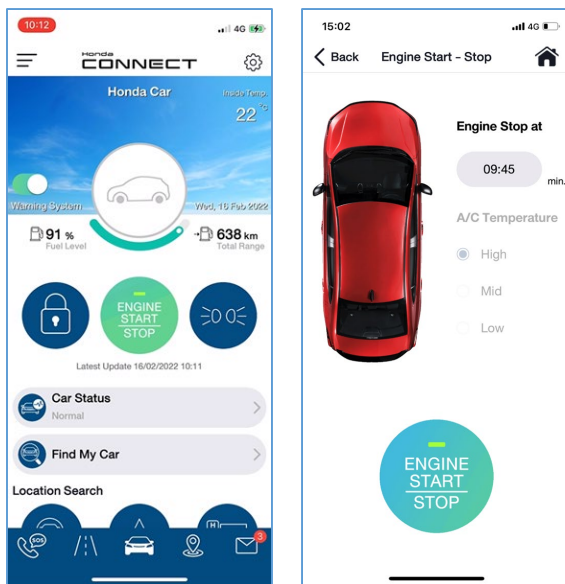

However, these cases are rarely occurred.

4. Application Function

4-1 Remote Vehicle Control 4-1-2 Engine Start/Stop (AUH)

Limitation of TCU to update Remote Engine Status

Telematic Control Unit (TCU) will send update engine status only 1 time after commanded. As data is sent via telecommunication network which engine status may not update due to network error. Below are the sample cases;

1. Engine Start/Stop button is remained activate after send engine stop command;

Cause;

Engine stop data is lost while sending due to network error.

Solution;

Push IG ON then IG OFF on vehicle to update correct status.

2. Engine Start/Stop button is remained activate after send engine stop command;

Cause;

Fast command Start engine then Stop engine may cause data mis order. Engine Stop command may send prior Engine Start command then button status is keep activated even actual engine is stop.

Solution;

Push IG ON then IG OFF on vehicle to update correct status.

However, these cases are rarely occurred.

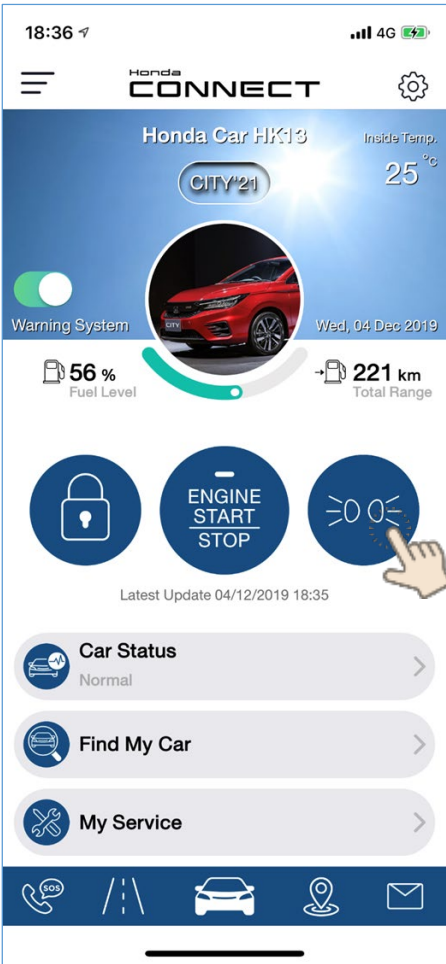

4. Application Function

4-1 Remote Vehicle Control 4-1-3 Light ON (AOC)

- This function can activate for Light ON.

Page of application function

Tap function icon to command remote light ON.

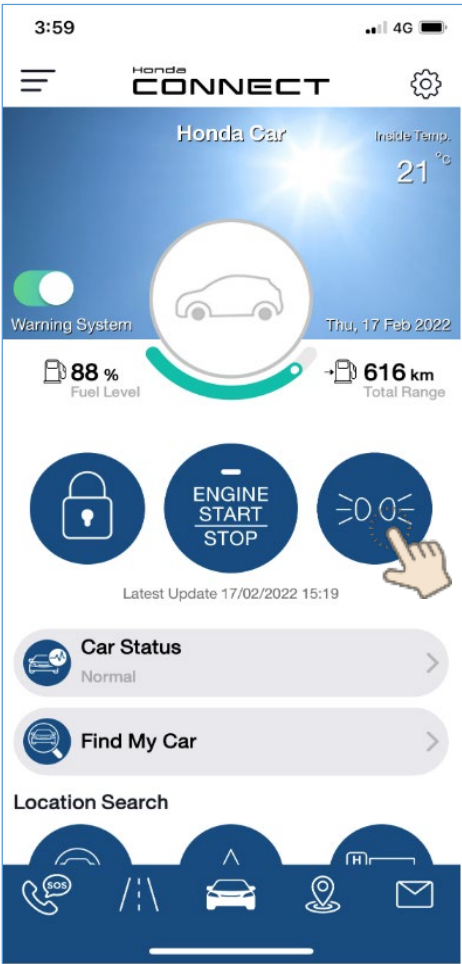

4. Application Function

4-1 Remote Vehicle Control 4-1-3 Light ON (AUH)

- This function can activate for Light ON.

Page of application function

Tap function icon to command remote light ON.

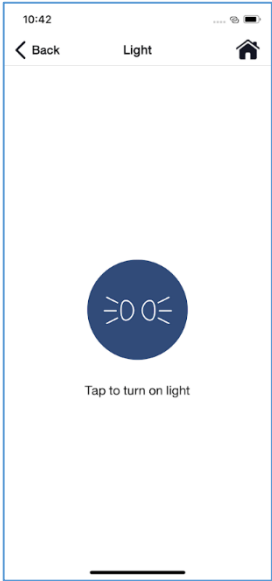

4. Application Function

4-1 Remote Vehicle Control 4-1-3 Light ON

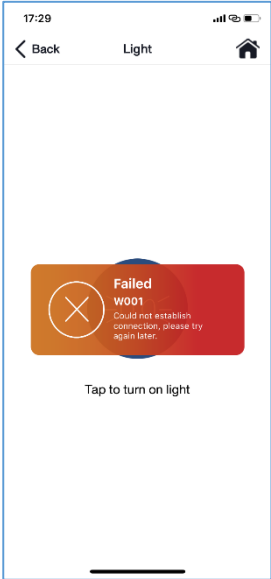

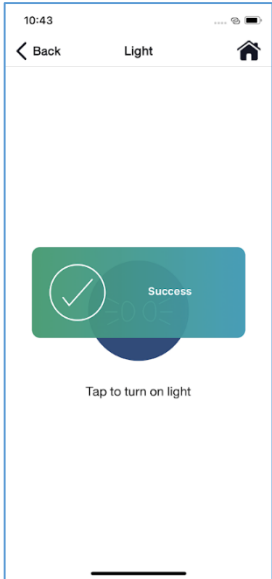

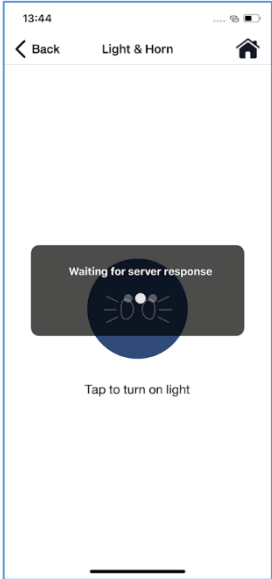

Select to turn on light

To assure the command will be conducted, confirmation message will display.

Result of command

Server will response and show the result of command.

• Processing

• Success

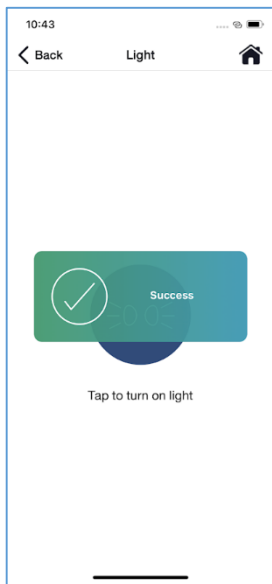

• Failed

4. Application Function

4-1 Remote Vehicle Control 4-1-3 Light ON

Remote Light ON Success

To assure the command will be conducted, confirmation message will display.

Usage Condition

- When remote light is activated both headlight and tail light will turn on and continue blinking for 30 seconds. Then it will turn off automatically.
- During activation, it is unable to turn off by Honda CONNECT App. Function icon on TOP page1 always keep in Blue color.
- Remote activated light will be possible to turn off by door unlock.
- Commands will be impossible during driving
- Car must be in IG OFF condition
